## MAINTENANCE

The DUW drain system is made from durable, non-porous, hygienic, and rust-free stainless steel. Prior to cleaning, carefully remove the grate for either end of the drain using the extraction tool. Exposed surfaces of the DUW drain System may be cleaned and maintained using mild soaps and a soft cloth. DO NOT use any abrasive cleaners, scrub pads or allow household cleaning agents, such as Bleach, to sit on the drain cover for an extended period. Prolong exposure to road salt, sea salt, or chlorine may have caused "surface" rust, which can be removed using Barkeepers Friend®, Soft Scrub® with Bleach, or Steel Brite®. Always follow the manufactures directions on the container. Follow proper maintenance procedures to prevent excessive surface rust. In areas of frequent exposure to salt, chlorine, and other chemical compounds, maintenance of the stainless grates should be performed at least 2-3 times per year.
